

MAKING LAPBOOK

Level – any

Subject – Clil – any school subject

Aids: document folders, pictures and texts about the topic, pairs of scissors, glue

Teacher: Pavlína Drnovcová pavlina.drnovcova@gymso.cz

Instructions:

- each student makes his own lapbook and has same topic (example: human skeleton)
- Fold the file folder to make the lapbook base.
- Cut out your mini-books with texts and pictures and put them together.
- Glue all the pieces onto the file folder.
- during the school year they can add more topics together

What is a Lapbook?

A lapbook is a visual representation of interesting facts about a certain subject. It consists of a file folder (or folders) base with mini-books, foldables, lists, charts, graphs, layered books, and/or accordion books fixed to the base.

There are actually a wide variety of ways to make the mini-books. You can find some free templates for lapbook components on the internet. We love to use these to make our own lapbooks on any subject!
