

“HANDBALL” - chain of concepts

Level – any

Subject – Clil – any school subject

Aids: ball

Teacher: Pavlína Drnovcová pavlina.drnovcova@gymso.cz

Instructions:

- pupils sit in a circle (suitable for teaching outdoors)
 - The first pupil tells the cell organelle and throws the ball to the second pupil, who answers the function of this organelle. Then he throws the ball to another student and says another organelle, etc.
 - It's a good activity for all school subjects and many topics.(in biology for example: cell, hormones, animal and plant systeme etc.)
-
